B. Battery housing
C. Atomizer cone
D. Refillable cartridge
E. Atomizer head
F. Rechargeable battery

The Tornado eGo-C Slim
The Tornado eGo-C Slim is an alternative version of the existing Tornado eGo-C changeable system. It features a new battery housing with the ability to replace the rechargeable battery as well as allowing users quickly to check and change the atomizer head.

The Tornado eGo-C Slim battery enables over 150 standard puffs. Charging takes approximately 2 hours. The unique changeable tank system uses refillable tanks that are more economical than traditional e-cigarettes.

The Tornado eGo-C Slim's design is lightweight and comfortable to use. To ensure the optimal performance and safety of your Tornado eGo-C Slim, please read the entire manual for all instructions and precautions.

Charging the battery
The Tornado eGo-C Slim uses a 3.7v 360mAh lithium-ion battery. It should be charged using the dedicated charger. Charge time is approximately 120 minutes (based on a fully discharged battery).

To charge the battery, place it into the charger ensuring that the polarity is correct. Plug the power cord into an appropriate USB port that is designed for supplying sufficient power. A red LED will illuminate on the charger to indicate charging has commenced.

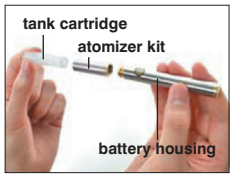
The LED will turn green when charging is complete.

- Use only the dedicated Tornado eGo-C Slim battery. Do not use other batteries, this could lead to damage and malfunction.
- Use a dedicated powered USB port to charge the battery when using a computer.
- A lithium-ion battery is a consumable item. Usage time will gradually degrade as the number of recharge cycles increases.
- Ensure battery is fully charged before first use.

How to assemble your Tornado eGo-C Slim
The Tornado eGo-C Slim is composed of a rechargeable battery, battery housing, atomizer, atomizer cone and tank cartridge.

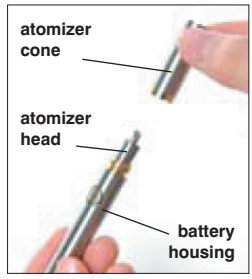
To assemble, first insert the battery, positive terminal toward the atomizer, into the battery housing. Insert the battery cap and slowly rotate until it locks into place and the ball bearings are seated in the holes on the housing.

Insert the atomizer into the atomizer cone and screw the cone on to the battery housing, until finger tight.



How to add liquid to the tank cartridge.
Insert the tip of the liquid bottle into the hole in the cap and fill ensuring to leave a 2mm space at the top. Insert the filled tank into the cone until it clicks so that the plastic cap sits flush onto the spike of the atomizer. Do not overfill.

How to replace the atomizer head
Remove the tank cartridge and unscrew the atomizer cone from the battery housing. The atomizer will be located on top of the battery housing once the atomizer cone has been removed. This ease of access allows you to replace easily or clean the atomizer.



How to use the Tornado eGo-C Slim
To use, simply inhale slowly while pressing the LED button on the battery housing. You will feel and taste the vapour gently being inhaled. Let the vapour collect in your mouth and enjoy the taste. Do not inhale too strongly as this will degrade performance and could flood the atomizer.

- Ensure the Tornado eGo-C Slim is fully charged and assembled correctly, refer to assembly instructions in this manual.
- The initial state of the battery setting is off.
- Press the battery switch 5 times within 2 seconds to switch on.

- Hold down the button as soon as you start to inhale. Release at the end of inhalation. If the button is held for too long it will shut off to prevent overheating. Please allow time to return to normal temperature if this occurs.

Battery power saving feature
This product has a power saving feature to avoid battery drain. To switch the battery off, press the LED button five times within two seconds. The LED button will flash as the device turns off. The Tornado eGo-C Slim will not function in this mode. To turn on, press the LED button five times within two seconds.

Proper tank cartridge separation
To separate the tank cartridge from the Tornado eGo-C Slim, hold it with the battery pointing upwards. Slowly twist and pull the cartridge down and out of the atomizer chamber. This prevents accidental spilling of liquids if the cap is accidently opened in the process.

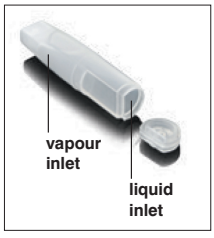
Maintaining the product
The Tornado eGo-C Slim requires some maintenance to ensure it continues to function correctly. Please keep it in a clean environment such as a case. Regularly wipe off with a clean lint free cloth around the joints and outside surfaces of your Tornado eGo-C Slim.

- **Battery.** Use a genuine Tornado eGo-C Slim charger and wall adapter to recharge the battery. Do not store the battery in direct sunlight, excessive heat, near fire or in places with extreme cold or high humidity. Do not drop or puncture the battery.

- **E-Liquid.** Storing e-liquid in an environment that is too hot or too cold may cause it to deteriorate. E-liquid should be stored in a cool place away from direct sunlight. Do not freeze e-liquid. Do not drink e-liquid. If e-liquid gets into your mouth or on your skin, wipe the area with a tissue and rinse clean with plenty of water.

- **Atomizer kits.** If your atomizer begins to feel hot during use discontinue use until the unit cools down. If the coil in the atomizer head is dry, you may experience burning taste. Please ensure there is enough e-liquid in the cartridge and do not vape when your cartridge is empty. To remove burnt taste, clean or replace the atomizer.

- **Tank cartridge.**
Tank cartridges are disposable and will need replacing periodically. If cleaning is required, start by first opening the inlet cap, rinse with fresh water, then wipe dry. Do not use teeth, knives or nail clippers etc, to remove the tank cap. Doing so may lead to injury or damage the tank causing it to leak.



Precautions and frequently asked questions
- Do not bite down hard on the inlet portion of the Tank Cartridge as this may cause the small inlet cap section of the cartridge to become dislodged and present a choking hazard.
- To function properly, e-cigarettes require the mixing of liquid and air. This may sometimes cause condensation to build up within the cartridge and atomizer. This is normal, however it may lead to problems, if it is not cleaned out. To prevent such problems be sure to wipe away any excess liquid.

Burning taste
A. Inhale 2-3 times without pressing the LED button. This allows e-liquid into the atomizer chamber. Then use as you normally would by pressing the button while inhaling.
B. It may also be necessary to remove any excess liquid within the atomizer cone after the above step.
C. If this does not resolve the issue, then repeat the method again, clean the atomizer, or replace the atomizer head.

Batteries should only be stored in temperatures between 32F to 104F (0C to 40C).

Tank Usage
Ensure the tank is fully inserted into the atomizer chamber. If there is a space between the cartridge and the atomizer, it may create abnormal air flow and could result in fluid leakage.

Refill the tank cartridge before it is fully empty. When the liquid level goes below 10%, the remaining liquid may leak. This phenomenon is caused by the weakening of the fluid tension within the cartridge.

What e-liquid can I use?
We recommend only e-liquid designed for use in an electronic cigarette is used in your Tornado eGo-C Slim as other liquids and water may result in damage to the unit.

Can I use regular AAA batteries?
Regular AAA batteries may cause damage, please use only the recommended batteries.

Can a rapid battery charger be used with the batteries?
Third party chargers may cause damage, fire or explosion risk. Please use the recommended Tornado eGo-C Slim battery charger only.

Warning
Electronic cigarette products are intended for adults over the age of 18 or the legal smoking age depending on your State or Country. Our products are not intended for children, pregnant women, non-smokers or smokers seeking a smoking cessation product.

Electronic cigarettes are not smoking cessation devices and have not been approved as such. If you're seeking a smoking cessation method, please consult your healthcare providers or organisations that deal specifically with quitting smoking.
